Mail Order Form
FOREWORD

This catalogue lists in numerical order, all standards and related publications approved by the SON Standards Council and published by Standards Organisation of Nigeria (SON).

The information in this catalogue is published annually. The arrangement and structure of this catalogue follows the guidelines established by ISO 7220 on the presentation of catalogues of standards and similar publications.

Most of the Nigerian Industrial Standards are mandatory specification.

HOW TO USE THE CATALOGUE

Numerical list of standards

This is the principal section of the catalogue containing the following information for entries

Standard Designation
Year/Date of publication
Number of pages
Price group
International classification for standards (ICS)
Title of standard.

STANDARDS DESIGNATION

Gives the alphanumeric reference number of the standards consist of prefix (as given above) and number that has been allocated to the specific publication (standards). Standards are listed in the following order:

NIS 01:1992  Pages: 10  Price: A  ICS 97.180
Standards on safety matches
YEAR OF PUBLICATION / EDITION

Gives the year in which the standards have been issued. In the case of adoption or other foreign standard; the year of the issue of the source document is given.

ICS NUMBER

List the publication according to ICS (International Classification for Standards) number. The ICS system groups publications by subject matter

DRAFT STANDARDS LIST

This list the various draft Standards in progress at several levels of production.

WITHDRAWN STANDARDS

List Standards withdrawn from circulation due to disuse or replacement by another approved Standards.

KEYWORD-IN-CONTEXT (KWIC) TITLE INDEX

This gives alphabetical key words of the Standards titles to enable users to access information where title or number is not known.

List of SON publications

1. **NIGERIAN INDUSTRIAL STANDARDS**: There are over 400 published standards covering over 350 products from different sectors. Prices vary depending upon the particular standard and number of pages. However, the cheapest standard sells for \( \text{₦1000.00} \) a copy.

2. **NIS CATALOGUE**: This is a publication of SON comprising the highlights of all approved standards. Price = \( \text{₦3,500.00} \).

3. **SON JOURNAL**: This is a technical journal of SON that contains research articles relevant to the activities of the Organization, technical papers delivered at conferences, seminars, and workshops relevant to standards, quality assurance and metrology. Price: = \( \text{₦500.00} \).

4. **ANNUAL REPORT**: This is a yearly report of the operations of the Organization over the preceding year. Price: Free.

5. **SON YELLOW PAGES**: This is an official publication of directory of NIS Award companies and their products. Price:= \( \text{₦5,000.00} \)

6. **THE NIS CERTIFICATION MARK**: This is a small pamphlet introducing the essential procedure and benefits of NIS mark to interested manufacturers.

7. **REQUIREMENTS FOR THE CERTIFICATION MARK**: This is another small pamphlet that specifies essential in-plant quality control system requirements to be met by manufacturers, seeking to be certified.
8. **Miscellaneous** e.g. compilation of important speeches of World Standards Day ceremonies, seminars and press briefings.

**NOTE:** SON reserves the right to review prices of any of its publications as the need arises, without prior notification to its clients.

**SON Enabling Decree**

The Standards Organisation of Nigeria (SON) was established by Decree No 56 of 1971 with the sole responsibility for establishing and elaborating standards for products and processes. In addition, it is to ensure compliance with the Federal Government policies on standards and quality control of both locally manufactured and imported products throughout the country.

The Decree has undergone three amendments since inception. In 1976, the decree underwent its first amendment when the Honourable Minister of Industries was conferred with the power to prescribe mandatory standards (Decree No 20 of 1976).

A second amendment was effected vide decree No 32 of 1984 which changed the name of the Organisation from Nigerian Standards Organisation (NSO) to the Standards Organisation of Nigeria (SON) to avoid confusing the agency with the Security Agency of the Federal Government then known as the Nigerian Security Organisation.

Decree No.18 of 1990, the third amendment, excised the Organisation from being an integral part of the Federal Ministry of Industries. It granted the Organisation the status of a body corporate with perpetual succession and a common seal that can sue or be sued in its corporate name.

The last amendment of 1990 has had far reaching impact on the corporate image of SON as it enhanced the status and powers of the Organisation to carry out its statutory functions in the industrial sector of the national economy.

The highlights of Decree No 18 of 1990 include:

- Upgrading of the Chief Executive's position to Director General/Chief Executive
- Provision for Directors, Secretary/Legal Adviser;
- The appointment of the Director-General by the President and Command in Chief of the Armed Forces on the recommendation of the Minister.
- Provision for strict enforcement of the powers of seizure, confiscation and destruction of substandard products and to seal up the premises where such products are manufactured or stored; and increasing the penalties for offending manufacturers, importers and sellers of substandard products.
SON statutory functions

The functions of the Standards Organisation of Nigeria as entrenched in enabling decree No.56 of 1971 and its subsequent amendments include:

(a) to organise and do everything necessary to ensure compliance with Standards designated and approved by Council.

(b) to undertake necessary investigations of the quality of facilities and products manufactured in Nigeria and imported, so as to establish a Quality Assurance system including certification of factories, products and laboratories;

(c) to ensure reference standards for calibration and verification of measures and measuring instruments;

(d) to compile an inventory of products requiring standardisation;

(e) to compile Nigerian Standards specification;

(f) to foster interest in the recommendation and maintenance of acceptable standards by industry and the general public;

(g) to develop methods for testing of materials, supplies and equipment, including items purchased for use of departments of the Government of the Federation or a State and private establishments;

(h) to prescribe standards for mandatory status;

(i) to undertake preparation and distribution of standards samples;

(j) to establish and maintain such number of laboratories for its functions under the law;

(k) to compile and publish general scientific or other data;

(i) resulting from the performance of its functions under the law or

(ii) from other sources when such data are of importance to scientific or manufacturing interest or to the general public and are not available elsewhere;

(l) to advise any department of the Government of the Federation or a State on specific problems relating to standards specifications;

(m) to sponsor such national and international conferences as it may consider appropriate;
(n) to co-ordinate all activities relative to its functions throughout Nigeria and to co-operate with corresponding national or international organisations in such activity as it considers necessary with a view to securing uniformity in standards specifications; and

(o) to undertake any other activity likely to assist in the performance of the functions prescribed for it under the Act setting up the Organisation.

The Nigeria Standards Council (The Governing Council of SON)

The Nigerian Standards Council is the governing body of SON set up under section 2(1) of the Enabling Decree No.56 of 1971. The main functions of the Council as contained in the enabling Decree section 3 (1) include among others:

(i) to advise the Federal Government generally on the National Policy on Standards, Standards specifications, Quality Control and Metrology;

(ii) to designate, establish and approve in respect of metrology, materials, commodities, structures and processes for the certification of products in commerce and industry throughout Nigeria;

(iii) to provide the necessary measures for quality control of raw materials and products in conformity with the standards specifications;

(iv) to determine the overall policy of the Organisation, in particular with regard to the financial, operational and administrative programme of the Organisation and to ensure the implementation of the said policy;

(v) to determine appointments, remunerations and other conditions of service of Directors, Secretary and other staff of the Organisation, and

(vi) to carry out other functions defined under the enabling decree or any other written law.

There are seventeen members of Council, from both the public and the private sectors of the economy. They hold office for a term of four years in the first instance. The Council meets not less than once every three months and on such other occasions as may be necessary.
Organisational Structure of SON

SON Management comprises the following Departments:

1. Standards
2. Quality Assurance
3. Laboratory Services
4. SON Training for Quality Assurance
5. Standards Library Services
6. Finance and Supplies
7. Internal Audit
8. Personnel Management
9. Legal Services
10. Planning, Information and Management System
11. Works/Maintenance
12. Public Relations

SON Objectives with Regard to Government Industrial Policy

2. In this connection, it prepares standards for products, and ensures compliance with Federal Government Policy on standards and quality of products for both locally manufactured and imported goods. It undertakes investigations as necessary into the quality of products in Nigeria and establishes a quality assurance system including certification of factories, products, laboratories and service. It maintains reference standards for calibration and verification of measures and measuring instruments and co-operates with corresponding national and international organisations with view to ensuring uniformity in standards specifications.

3. For the effectiveness of its operations, SON is empowered legally to apply penalty when necessary. This is in the form of seizure, confiscation and destructions of
substandard goods and services, or seal up factories and premises, which do not show compliance to standard requirements.

4. Among the numerous activities of SON are development of national standards, routine factory inspection and surveillance, certification, port inspection, consumer complaints and investigations, laboratory services, market survey/enforcement, joint activities with government agencies, and international standardization.

5. National Standards help to define products and specify quality assurance procedures for ensuring quality in production, to comply with established industrial standards. SON has recently made substantial progress in the elaboration of national standards by extending its activities to cover items such as petroleum products, gas cylinders and regulators, gasoline, etc. military materials, electrical/electronics products, steel products and many more. In order to curtail influx of substandard goods imported into Nigeria and maintain the quality of locally manufactured goods, SON has increased her effort on the development of relevant product standards. This is a weapon of regulation as well as for the rapid improvement of the economy, through the production of goods that can meet standards of other countries and thus encourage export. Now, SON has established over 400 industrial standards, covering all sectors of the Nigerian economy. It is important to point out that Standards are established to keep pace with industrial development since it would be both wasteful and futile, to establish standards that would not be put into use by anybody. SON ensures that all established standards do specify all the functional characteristics of excellent quality grade products that are produced in Nigeria. Therefore by implication, all standards established by SON, are tailored to assist manufacturers already in production or about to start production to produce excellent quality grade products. To achieve a consensus in standards elaboration, SON works through technical committees of well-balanced interest groups such as manufacturers, consumers, scientists, engineers and general interest groups.

6. The implementation of established standards is carried out through the following activities.

6.1. **Routine product (factory) inspection and checks**
This inspection covers all factories in Nigeria (for quality audit of products manufactured nation-wide). Factory inspection procedure is usually intense and comprehensive, and designed to assess every aspect of production from raw materials to the finished products. SON also carries out inspection of in-plant quality control system, as well as detailed report and feedback to each factory, after inspection.

6.2. **Product certification (NIS Certificate Award)**

After requisite inspection, SON awards annually, the Nigerian Industrial Standards Certificate (NIS certificates) to factories, for particular products manufactured by them. In 1992, for example, NIS certificates were awarded to 165 manufacturing
companies for 388 products. The NIS certificate award affords the manufacturer product acceptability in the market and consequently, higher volume of sales. Concurrently, it guarantees excellent quality grade products and thus assures the consumer that he is getting good value for his/her money.

### 6.3. Port inspection

It is mandatory for SON to inspect and ascertain the quality of products imported into Nigerian markets, through her seaports and airport. Now SON effectively covers the seaports in Lagos, Port Harcourt and Calabar and Mally Aminu Kano Airport as well as Murta Muhammed Airport, Ikeja, for this purpose. There are also moves to expand ports and border inspections comprehensively to cover all ports in Nigeria. Recently SON got formally registered with the Port Working Committee (PWC) to further facilitate its operations at the ports.

### 6.4. Consumer complaints and investigations

SON investigates all consumer complaints brought to it by the public thoroughly and expeditiously. On confirmation of any complaints claim, SON ensures that the defaulting manufacturer/vendor pays adequate compensation to the complainant. It is certain that SON is now making it possible for the Nigerian consumer to recognize and assert ones rights with regards to purchase of products.

### 6.5. Market survey and enforcement

Ensure that the quality of imported products in the market conform with the established and acceptable standard for safety and customer satisfaction. This is to control the influx of fake and substandard products into the market at the expense of ignorant consumer.

### 6.6. Laboratory Operations

The volume of products from various industrial establishments all over Nigeria, as well as those imported into the country which are brought to SON for analysis is quite high. These products are analyzed to ascertain their quality at SON laboratory in Lagos or some other laboratories which are accredited by SON for such analysis. Through Federal Government - UNIDO partnership programme SON has functional Engineering laboratory in Enugu, Textile laboratory in Kaduna and Chemical laboratory in Lagos. The establishment of Metrology laboratory in Abuja is in top gear.

### 7 Standards Reference Library

Decree 56 Section 5 of 1971 established the Standards Organisation of Nigeria Library and is responsible for maintaining highest standard service at all time.
The objective of the library is to assemble and maintain a collection of standards, Technical regulations, books and such other materials it considers appropriate for Reference library. Thus, the library represents the reference point for national and international Standards and holds about 40,000 documents from national bodies such as NIS, BSI, BIS, JIS, ANSI etc and international organisations like ARSO, ISO, IEC, FAO/WHO, ITC etc.

The library makes its facilities available for reference and research purposes. The Library also sells both local and international standards and other normative Publications.

8 Joint activities with government and non-governmental agencies

Recently SON had encouraged good relationship and co-operation with other governmental and non-governmental agencies involved in regulation and standardization activities. These agencies include: Food and Drug Administration and Control of the Federal Ministry of Health and Human Services, Manufacturers Association of Nigeria, Customs and Excise, on joint operations at the port Export Promotion Council, in the computation of in-put - output coefficient schedule for Duty Draw Back Scheme, Central Bank of Nigeria, through SON's membership on the Comprehensive Import Supervision Scheme (CISS), Ministry of Foreign Affairs for information, on International Standards, which provide vital data for export transactions, as SON is expected to relate to the export processing programmes. The agencies that work closely with SON, includes: Federal Institute of Industrial Research, Oshodi, Nigerian Society of Engineers, Federal Environmental Protection Agency, Quality Control Society of Nigeria, Raw Materials Research and Development Council, and most recently, Federal Road Safety Commission, for the development of Standards on used vehicles and their components.

8.1. SON has a very good working relationship with many National Standards Bodies worldwide. SON is also an active member of International Organisation for Standardisation (ISO), African Regional Organisation for Standardization (ARSO), Codex Alimentarius Commission (a food standards agency of joint FAO/WHO), and a subscribing member of the International Electro-technical Commission (IEC).

There is no doubt, that in recent times, SON has taken giant strides towards executing most of its statutory functions in all their ramifications.
