3. The project includes the following components :

The Project will comprise of the following four (4) components:

Component 1: Harmonization of standards for dairy, horticulture, fisheries, and aquaculture value chains: This component will support implementation of the following activities:

- (a) identification of existing standards and guidelines on dairy, horticulture, fisheries, and aquaculture value chains from different sources, institutions and/or countries;
- (b) development of harmonized standards; and
- (c) holding meetings of policy makers and practitioners to validate the harmonized and

certified standards on dairy, horticulture, fisheries, and aquaculture value chains.

Component 2: Capacity Building for trainers, producers, auditors, certification bodies, testing laboratories and inspection bodies: The component will involve the following activities:

- (a) development of training and certification modules for dairy, horticulture, fisheries, and aquaculture;
- (b) development of conformity assessment policies and procedures & work instructions;
- (c) development and validation of certification guidelines and checklists for harmonized dairy, horticulture, fisheries, and aquaculture;
- (d) capacity building and training for trainers, producers, auditors, certification bodies, testing laboratories and inspection bodies; and
- (e) carrying out certification audits and award qualifying products.

Component 3: Development of Brochures for Sensitization, Outreach and Promotional Materials on Key Products: The component will include:

- (a) development of illustrated sensitization and promotional materials for key products based on the characteristics certified by the standards and verifiable claims;
- (b) development of value addition modules for selected products in dairy, horticulture, fisheries, and aquaculture;
- (c) preparation of comprehensive technical guidelines on the range of value-added products from selected African products; and
- (d) build databases of test laboratories, auditors, and certification bodies with capability to conduct audits, testing and certification.

Component 4: Project Coordination and Management: The component will include support for:

- (a) implementation, coordination and monitoring of the Project;
 - (b) financial and administrative management of the Project;
 - (c) holding meetings for the Project Steering Committee; and
- preparation of the audit and activity reports as well as annual work and procurement plans for the Project.
